

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

HERTFORD:

PRINTED BY STEPHEN AUSTIN AND SONS.

PREFACE.

THE University of Leyden was founded in 1575 as a reward to the citizens for the heroism they had shown in the great siege of the previous year. Its first Professors were selected from among the most distinguished scholars of the age, and from that day to the present the University of Leyden has been in the foremost rank of the Academies of Europe. Three hundred years after its foundation, in the year 1875, the University published a list of all its Students under the following title: "Album Studiosorum Academiae Lugduno Bataviae MDLXXV - MDCCCLXXV. Accedunt Nomina curatorum et professorum per eadem secula. Hagae comitum apud Martinum Nijhoff MDCCCLXXV." It is a large quarto volume, containing 1440 columns, exclusive of 280 pages of Index.

The following pages contain an Index of all the persons occurring in this catalogue who could be identified as English-speaking people. That it is perfect I do not believe, for at some periods it was the habit to enter Students without indicating their nationality, and there is also good reason for believing that some refugees are put down as inhabitants of the Netherlands who should have been given under

England, Scotland, or Ireland. It is hoped, however, that almost every name of importance has been found. The strange forms into which our names have been transmuted by the Leyden registrars has been a source of much confusion. Some are corrupted beyond hope of recovery, others are arranged under wrong initial letters. The cross-references given will be of some use in this matter, but many of the forms are so uncertain that it was not always safe to offer aids of this kind. Mere guesses, in this as in most other matters, would mislead much more frequently than they would help.

British scholarship and British freedom owe very much to the Netherlands, and especially to that great University where so many of the most thoughtful children of these islands were instructed in the highest and best knowledge of the time, during the long period when the Universities at home were closed against those who objected to religious tests.

EDWARD PEACOCK.
